Sailfish
CATAMARANS

WHAT MAKES A CATAMARAN DIFFERENT

TWIN ENGINE RELIABILITY

All Sailfish Catamarans are twin engine installations with twin ram hydraulic steering. Should you lose power in one engine you can get home safely on the other (and with many setups still get the boat on the plane). The independent steering means you still track straight and turn with ease getting you home safer.

LOWER HORSEPOWER

With fuel prices ever on the increase, Sailfish Catamarans aluminium construction means they are lighter than their fibreglass competitors. This allows you to run lower horsepower engines with lower fuel consumption for the same performance figures.

ECONOMY / KNIFE V SPOON EFFECT

General consensus suggests that catamarans use up to 45% less fuel than equivalent mono hull boats. Their minimal wetted area means less drag and friction and therefore less fuel needed to move the boat. This design can be compared to a knife v spoon effect, where a mono hull has a much larger surface area moving through the water, as compared to the knife of a catamaran hull. Sailfish Catamarans have purpose built planning hulls meaning that even less of the hull is in the water at speed, further reducing fuel consumption compared to other catamaran brands.

LIGHTER LANDINGS

As a catamaran travels forward, air is forced down the tunnel and is compressed between the hull and the water line. This becomes like a gas shock absorber allowing the boat to ride on a cushion of air. Should the boat leave the water, re entry is much smoother than a mono hull as the air trapped in the tunnel and lower hull surface area combine to give less slap / pounding and thus a smoother ride. This is why owners of Sailfish Catamarans often comment that the faster they go the better the ride gets!

NO ROLLING EFFECT

Traditional mono hull boats roll on the V. The deeper the V, the worse the roll, the flatter the V, the harder the ride. This rolling can often be compounded with each wave creating a pendulum style effect. Catamarans have 2 hulls spaced apart so there is no edge to roll on while having buoyancy on the outer edges of the boat where it is needed.

SAFETY AT SEA

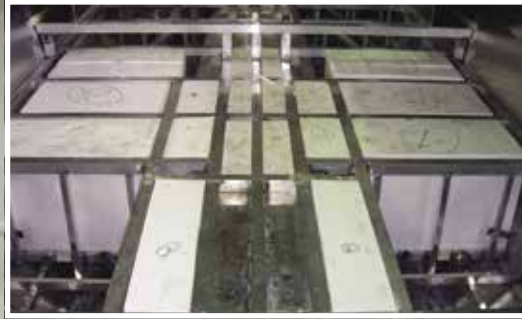

It is quite simply a fact that catamarans offer a safer hull than a mono. All good catamarans offer two separate tanks, self draining decks, foam filled sponsons as a standard feature, dual engines, unmatched stability and amazing rough water performance.

COMMERCIAL HERITAGE

Sailfish Catamarans were initially designed to meet the highly demanding needs of government and commercial operators. These customers demand hulls capable of handling extreme sea conditions with strength and reliability. These users put our boats through severe conditions on a daily basis and have been reordering our boats for over 20 years. It is these testing grounds that ensure your Sailfish Catamaran meets the demands of even the most rugged recreational users.

FEATURES & BENEFITS

5 YEAR STRUCTURAL HULL WARRANTY

CUSTOMISING OUR SPECIALITY

The flexibility of aluminium means you are not locked into a particular layout of your boat. Your boat is customized to suit your own individual needs, style and budget by experienced consultants.

1. DURABLE ALUMINIUM CONSTRUCTION

Aluminium boats are far more durable than comparable GRP hulls, easier to repair, won't suffer osmosis, and will last longer. The most preferred construction for commercial applications.

2. CUSTOM ALLOY TRAILERS

Sailfish trailers are lighter, stronger, will never rust and are tailor made for your boat, making launching and retrieval a breeze. A perfectly matched combination all built in our own factory.

3. LIGHTER TO TOW

Aluminium hulls and trailers mean you can tow a bigger boat behind your car compared to fibreglass, or tow the same size for a lighter weight overall. This is both safer and will result in less fuel and wear and tear on the tow vehicle.

4. TWIN HULL DESIGN OFFERS UNMATCHED STABILITY

Varying beam options allow you to maximise your stability. All boats have their beam carried as far forward as possible to maximise stability at rest, thus a safer and more comfortable boat.

5. SELF DRAINING COCKPITS

Ultimate safety levels and peace of mind while travelling offshore.

6. UNIQUE DRAG RESISTANT HULL LINES

Offers incredible fuel efficiency and lower horsepower requirements. You get a cheaper day on the water.

7. BOX SECTION FRAME CONSTRUCTION

By using a box section rather than channel, your boat is more rigid and stronger and stands the test of time.

8. 25MM SOLID KEEL & 6MM CHINES

Strengths where it counts, and the backbone of your boat. Unmatched protection at ramps or beaches and when fishing reefs or uncharted waterways. Total peace of mind.

9. UNIQUE TURNED DOWN CHINES

Flatter turns and less spray. A safer, drier ride.

10. FULL BOW SPONSONS

Increased buoyancy in the bow of your boat allowing a flatter, safer turn, better control and safety, especially in a following sea and bar crossing situations.

11. FOAM FILLED HULLS

All our hulls are foam filled making them both the safest and quietest catamarans on the market.

12. HIGHEST QUALITY 2 PAC PAINTWORK

All our boats are painted using a 3 part process using the best materials available ensuring your boat looks its best for longer. All holes are pre drilled prior to painting ensuring a full seal to your paintwork.

13. ERGONOMICALLY DESIGNED HELM AND DASH LAYOUTS

Designed to suit you and your electronics, keeping you comfortable for long days out on the water.

14. ISYMMETRIC HULL DESIGN

True, straight running in the most demanding seas.

15. DOUBLE WELDED CONSTRUCTION

Additional strength by welding the inside and outside of most joints. This feature also allows us to smooth off the outside weld, allowing an almost seamless finish to our welds.

16. MARINE GRADE TINNED WIRING

Long life and easy servicing to your wiring harnesses.

17. FULLY WELDED DECK HARDWARE

All our bollards, cleats and handrails are fully welded, offering unparalleled strength to your deck fittings.

18. ANTI SKID DECKS

Increased traction around those slippery areas, making life easier even in the roughest of seas.

19. BETTER RESALE VALUE

Sailfish Catamarans are a controlled low volume / high quality hand crafted product.

20. HYDROFLOW GEN III HULL

No other manufacturer utilises the unique design characteristics this hull has to offer. Please see page 6 for more details.

SPORTS FISHING SERIES

REEF MASTER

Based on the award winning S7 hull and featuring the all new Hydroflow Gen III technology, the Sailfish Reef

Master with it's impressive 7.3m LOA is a sportsfisherman's dream. Light enough to be easily towed behind most mid size vehicles, economically powered with as little as a pair of 100hp 4 strokes and jam packed with features you would only expect in a much larger boat.

As many sport fishermen can attest to you can never have too much room and the enormous open and clean cockpit of the Reef Master allows you to comfortably fight any fish with ease. The Reef Master is a boat that certainly punches well above its weight in terms of features and offshore performance.

CANYON MASTER

Originally built to celebrate 20 years of class leading boat

building, Sailfish Catamarans are proud to offer the all new Sailfish Canyon Master which has raised the bar once again. Capitalising on the success of its stable mates, the Canyon Master offers boaters an enormous cockpit matched with a generous overnight cabin. Couple this with unheralded on-water performance this is a boat that dedicated blue water anglers will relate to.

With a length overall now of 8.2m and beam of 2.45m, this is an imposing boat both on and off the water. The super efficiency of the Hydroflow Gen III Hull means the Canyon Master can be powered with as little as 2 x 130hp Outboards. Development in direct response to customer feedback has resulted in a boat that is sure to become an icon of the Australian boating scene for years to come!

S8

Following on from the first ever back to back winning of the Australia's Greatest Boats Award, the S8 takes boating perfection to the next level.

The success of our boats is measured by one thing - our customers. The S8 has eclipsed all sales records in Sailfish's 25 year history and is set to be known as Sailfish's most iconic models of all time.

From the moment you step aboard a Sailfish S8 Catamaran, you will feel like you have finally found the boat that ticks all the boxes. The X Factor on these boats is truly undeniable.

From the transom that is perfectly set up for fishing, to the sink, BBQ and esky for your comfort, the rear cockpit is a delight to spend time in. This flows into the lockup cabin with fantastic visibility and natural light abound and inspires confidence behind the wheel in all conditions. The helms' success is in its simplicity - everything in arms reach and space for the latest electronic offerings. The forward entrance is welcoming and the internal space is generous in its layout with ample comfort for overnighting.

These features are all set upon the perfect foundation that is the award winning Sailfish Hydroflow Gen III Hulls. Stop wondering what owning an S8 would be like and take the leap into ownership - we know you won't look back!

**HYDROFLOW
GEN III**

2800 PLATINUM

EVERY NOW AND THEN A PRODUCT COMES ALONG THAT JUST TICKS ALL THE BOXES, AND THE 2800 PLATINUM GEN 3 IS THAT VERY BOAT.

The 2800 Platinum Series 3 now with 2.80m beam as standard was built with one clear objective... the ultimate blue water fishing performance available on a trailer in Australia.

With its pedigree based firmly in the rescue and commercial markets the 2800 Platinum has over the years become the pinnacle of recreational trailer boating in Australia and one of our all-time best sellers.

When the reels are screaming and all hell breaks loose on deck, room to move is vitally important to ensuring your best chance of landing that dream catch. The huge 2800 Platinum gives you a cockpit that would be the envy of any charter boat operator.

At 8.80m LOA and sitting atop the custom Sailfish Aluminium Tri Axle Trailer, launching and retrieving is an absolute breeze and coupled with the Sailfish Hydroflow Gen III Hull, you can power the 2800 with twin 150hp's for exhilarating hole shot and top end performance, along with mind blowing fuel economy that extends your day when the bite is on.

The 2800 Platinum comes with a list of standard features you will not find in any other boat, however as with all Sailfish Catamarans our difference is our willingness and experience in customising the boat to meet your specific needs. This ensures you have no redundancy in application and get the most out of your new dream boat. Contact your dealer and let us know what you want in your new boat and we will do our best to turn it into a reality.

3000 PLATINUM SPORTS

THE ALL NEW SAILFISH 3000 PLATINUM GEN 3 HAS EXPLODED ON THE SCENE AND HAS FAST BECOME ONE OF OUR MOST POPULAR MODELS.

The Sailfish 3000 ticks all the boxes with its two beam options - 2.8m and 3m, offering unprecedented flexibility to create the boat of your dreams weather kept on the water or as a maxi trailerable boat.

Want the ultimate Sports Fisher – done! Want to spend a week cruising around the Whitsundays - done! Why not roll the best of both worlds into one perfect all-rounder! With huge volume and massive range capabilities the Sailfish 3000 Platinum is the boat that can do it all!

The Sailfish 3000 forward cabin design offers a separate toilet / shower area and oversized double bed. Its helm accommodates the biggest of electronics screens and its alfresco opening window and BBQ servery brings the whole package together combining the best of the indoors and outdoors for the perfect social boat.

Do you have an idea for your new boat that other boat builders can't / won't do?? Speak to one of our qualified dealers today and let us work with you to build the best 30 footer available in Australia today.

PLATINUM SPORTS

TO CELEBRATE OUR 25TH ANNIVERSARY IN 2018, SAILFISH CATAMARANS TOOK THE PLATINUM SPORTS SERIES TO THE NEXT LEVEL, CREATING OUR BEST EVER LONG RANGE BOATS.

Available in 32, 34, 37 or 40 foot configurations and with generous beam of up to 4m, the Sailfish Platinum Sports Series are designed around your lifestyle ensuring you get the most out of your new boat.

The Platinum Sport Series is available in proven layouts that will excite the most avid sports fisherman or luxury cruisers with the soul and safety that Sailfish is world renowned for.

For those looking for something different, the huge footprint of the Platinum Sport Series creates a blank canvas for you to create a layout that will suit you best.

Whatever your boating demands, the team at Sailfish Catamarans will hand build your new Platinum Sport Series to their exacting standards with a team of award winning tradesmen. Everything from design, fabrication, paint and then final commissioning is done in house under the watchful eye of Australia's best boat builders.

Sailfish take the time to really listen to what you are looking to get out of your new boat. From the initial design brief right through to completion we keep you up to date throughout, allowing you to have input and the ability to refine your needs along the way, ensuring the finished product is a boat that you will be proud to own.

Get in touch with your dealer and start a discussion about your boating needs and let Sailfish Catamarans show you why the Platinum Sport Series is your ultimate offshore investment.

GAMEFISHER SERIES 2800 / 3000 / 3200

HYDROFLOW³
GEN III

When you take the helm in a Gamefisher Series there is no mistaking this as anything other than a pure fishing machine.

From the generous dash layout that accommodates the largest of modern screens, to the transom that features 2 live bait tanks, salt water deck wash, burley bucket and a fantastic walkout that you can fish from, this boat is designed to rack up the fish.

The rear cockpit of this boat where this boat starts to set itself apart from the crowd. The central bait station is the focal point of this cockpit and features generous cutting board surface, sink, grab rail, drink holders, storage box, knife holder, deck wash outlet, room for esky under and a removable seat.

The bait station sits well protected under the extended hardtop roof, providing much need shade for a long day on the water whilst falling short enough from the back transom to allow you to fight a game fish for hours.

Once the fish are on board, two huge underfloor kill boxes that are fully guttered and drained externally will keep the catch out of the sun and your boats floor clean and uncluttered. Add two huge 110lt fibreglass eskies that double up as seats to this and you have enough food / drink / catch storage for extended fishing trips.

The forward cabin has been designed to offer generous bedding with cavernous storage under and a full flush toilet. The cabin is lockable so whether you are overnighting or just filling the cabin with your fishing gear it will always be secure.

Available in 28 – 32 Feet with varying beam options, call your local dealer and see why the Sailfish Gamefisher Series should be your next boat!

Congratulations Sailfish Catamarans Canyon Master Finalist

CANYON MASTER

For those guys who are looking for a transition from a mono to a cat and thinking its going to be an entirely different experience, take it from me, it's not. The Canyon Master has unbelievable stability and a mind blowingly soft ride.

ANGELO SAN GIORGIO - EDITOR TRAILERBOAT MAGAZINE AND JUDGE, AUSTRALIA'S GREATEST BOATS

Exceptionally soft ride -this is top class. Planes at 47km/hr on one engine.

KEVIN SMITH - TRAILERBOAT MAGAZINE

A well-designed cat often has a superior ride over rough water compared to a mono. This is because the cushion of air between the sponsons acts as a shock absorber as the hull comes to rest.

JOHN FORD - TRADE A BOAT MAGAZINE

It just rides over and caresses the tops of the waves with that cushion of air. When you look at the speed you can't believe how fast you are actually going. As a diver- the layout is sensational.

Congratulations Sailfish Catamarans S7 Winner

S7

When you line up the Sailfish S7 against the other aluminium fishing boat contenders, it effortlessly combines family runabout and fishing weapon into one complete package.

As far as aluminium fishing boats go, the Sailfish S7 comes with a magnificent presentation. It has an inspiring level of detail and brilliant features, including a very workable layout. Our judges were impressed from the moment they stepped on board by the vast deck area and superior stability afforded by those twin powercat hulls.

The Sailfish S7 rides on that cushion of air under the tunnel as if you were in the clouds, and true to her feline appeal, has the tenacity to spring to attention with surprising agility when challenged.

No stone has been left unturned in attention to detail – the finished quality, welding prowess, general engineering, appealing fishing and clever layout combined with beautifully produced paint and finished surfaces to take the Sailfish S7 to the pinnacle of her class.

WINNER

Congratulations Sailfish Catamarans S8 Winner

S8

Wow! Quite simply wow! The X-factor on the magnificent Sailfish S8 has gone stratospheric.

Overall, the Sailfish S8 is one hell of a competitor in the tough world of offshore fishing machines. As judge John Ford commented, "There's nothing missing to make this the perfect fishing platform", while Kevin Smith added: "You can't not like it. Uncompromised stability that's typical of big cats, loaded with more rather than less. Turnkey and ready to rumble."

The hulls ride on a cushion of air, taming the slop and challenging wild seas with utter determination. Their huge footprint and inherent stability provide the ultimate trailerable fishing platform, but still allow for all of the creature comforts of large enclosed wheelhouses and cruising facilities. But for me personally, the S8 is up there as one of the best trailerable sportfishing packages of all time.

JOHN WILLIS - TRADE A BOAT MAGAZINE

SAILFISH TRAILERS - FEATURES & BENEFITS

OUR COMMITMENT TO ENSURING YOU OWN THE BEST PACKAGE AVAILABLE CONTINUES RIGHT DOWN TO THE TRAILER.

Trailers are often an overlooked part of your overall package, but can ultimately make or break a day out or holiday.

All Sailfish trailers are designed, engineered and manufactured in-house to be perfectly matched to your new boat. This allows us to perfectly support the hull, and balance the trailer to suit every boat regardless of engines and options.

You will be the envy of fellow boaters when, regardless of wind conditions or currents, your new Sailfish Catamaran glides effortlessly on and off your trailer.

On the open road enjoy the towing weight advantage of an aluminium trailer over traditional galvanized steel. Our aluminium trailers mean less wear and tear on the vehicle and decreased fuel consumption while towing. Our custom trailer extrusion and box section supports results in a stronger, more reliable trailer that will stand the test of time.

All Sailfish trailers are manufactured with only the best available components including:

- Independent Suspension Axles
- Stainless Steel Brake Calipers
- Rear Boarding Step
- LED Lights
- Hydrastar Hydraulic Brakes
- Alloy Wheels
- Multiple Tie Down Points
- Multi-Speed Winches

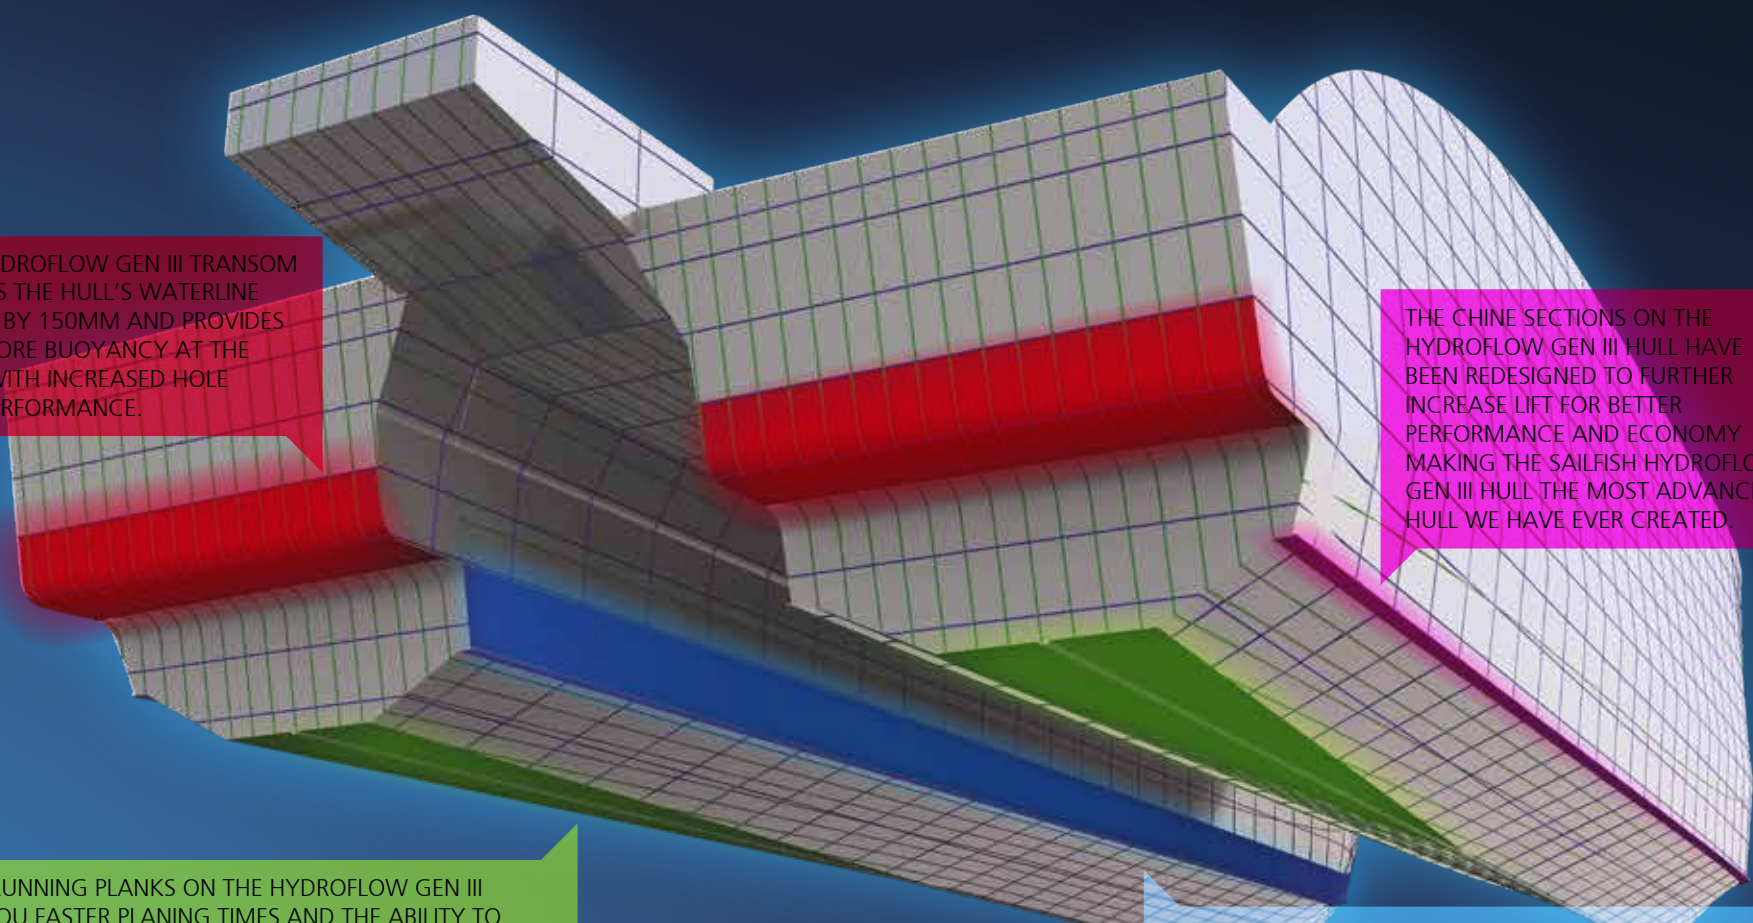

AVAILABLE TRAILER OPTIONS

- Stone guards
- Boat catch
- Front ladder
- Outrigger storage tubes

SAILFISH
HYDROFLOW GEN III FEATURES & BENEFITS

HYDROFLOW
GEN III

NEW HYDROFLOW GEN III TRANSOM EXTENDS THE HULL'S WATERLINE LENGTH BY 150MM AND PROVIDES EVEN MORE BUOYANCY AT THE STERN WITH INCREASED HOLE SHOT PERFORMANCE.

THE CHINE SECTIONS ON THE HYDROFLOW GEN III HULL HAVE BEEN REDESIGNED TO FURTHER INCREASE LIFT FOR BETTER PERFORMANCE AND ECONOMY MAKING THE SAILFISH HYDROFLOW GEN III HULL THE MOST ADVANCED HULL WE HAVE EVER CREATED.

WIDER RUNNING PLANKS ON THE HYDROFLOW GEN III GIVES YOU FASTER PLANING TIMES AND THE ABILITY TO PLANE AT LOWER RPM WHICH ALL ADDS UP TO BETTER FUEL ECONOMY. IT ALSO MAKES THE BOAT FLATTER IN TURNS FOR EASIER MANOEUVRABILITY.

THE STREAMLINED TUNNEL ON THE HYDROFLOW GEN III HULL ELIMINATES THE FUNNEL EFFECT ASSOCIATED WITH OTHER CATAMARAN HULLS. SAILFISH'S ATTENTION TO HYDRODYNAMIC FLOW PATTERNS HAS RESULTED IN HULL THAT HAS MINIMAL DRAG FOR MAXIMUM FUEL EFFICIENCY.

CUSTOMER TESTIMONIALS

DON'T TAKE OUR WORD FOR IT. HERE IS WHAT SOME OF OUR CUSTOMERS SAY.

Daniel Brauman - Sailfish S8

Wow... I mean, WOW! The first thing you notice is the attention to detail and craftsmanship that has gone into making one of these awesome Sailfish boats. When we first saw it at the boat show, and having been looking for six months for a bigger boat, we knew this was the boat for us. Once we got speaking to the team at Sailfish, and found out that they could custom design certain aspects to meet our fishing and boating needs, we knew we were on a winner. The Sailfish after-sales service is excellent, and they make you feel like part of an exclusive club.

Doing the amount of km's that we do, to go fishing, we needed a boat that was practical and versatile across wide range of conditions. The fact that we could also live in it was a bonus. The boat gives you such a safe feeling when you're inside the cab, and being able to close the doors and travel at speed really makes you feel safe in all weather conditions. The ride and the handling are second to none, and gives you a sense of confidence and security. Coming from a mono-hull to a catamaran, we noticed the stability and ride comfort immediately. The fact that it is aluminium, with lower weight, also meant that we didn't have to upgrade our car to tow the boat.

It's great for fishing in the southern ocean in the middle of winter. We are dry and warm, and we also come home safe. We would highly recommend a Sailfish catamaran to anyone that's in the market for a new boat.

Bob Thorn - Sailfish 3700

Having previously owned an alloy runabout, a Whitley, a Riviera and a 30 foot power catamaran I decided to purchase a new cat. I came across Sailfish Catamarans and saw they had won numerous awards. A quick Google search identified current owners and the statements of praise for the brand were numerous and glowing in their comments.

Although I had thought I'd be purchasing a fiberglass vessel I was open to alloy as long as the finish was on the mark. I had owned alloy runabouts year ago and was happy with the robust product but not the finish. Sailfish was a very different proposition..... the weight and strength of alloy but with a finish equal or even better than fibreglass.

My first face to face with the brand was the Sydney boat show and was very informative and the boats and their knowledge on their product was confidence building. Discussions with current and prospective Sailfish owners as well as industry reps from Yamaha and Furuno confirmed the quality and integrity of the brand. It was clearly considered top quality, leading edge and built to survey standard. A prelim Quote was supplied in 24 hours and the journey to ownership had begun. The path to delivery was underway and the other alternative brands were parked.

The trip to the factory and meetings with Darren and his very committed team gave me even more confidence to move forward. Within days a more detailed plan was produced and after discussions we settled on an increase in length to a 3700 design with a 3.5 beam. The Sailfish 3700 allowed the space I needed for family cruising and entertaining. Twin 300hp Yamaha's were specified to achieve 30-35 knots and all my requirements of Stability / Space / Speed and Safety were met.

Sailfish's total commitment and sincerity, enthusiasm, ability to change design and meet my requirements (right down to hull Colour and internal layout) and quality of the manufacturing process is why I chose a Sailfish Catamaran. Add to this the industry recommendations, customer comments, industry awards, quality of finish, flexible design evolution to suit my needs, is why although not cheap, they are great value for money.

May 2018 saw the boat delivered to the marina and the handover. An incredibly exciting and rewarding day for my wife, two children and myself. The boat looks and performs as expected and the Sailfish team has kept in contact to ensure everything is happening correctly right down to the finer details.

I'm more than happy to talk to future owners and I look forward to my trips in the Sailfish 3700... Until we build a new 45 footer!

Alan Blows - Sailfish S8

After extensive research and spending hundreds of hours at sea on a small mono hull boat, I decided it was time to upgrade.

The Sailfish S8 allows me to travel out to sea wider and on days when weather wouldn't permit me to do so on the smaller boat. The S8 has exceptional handling capabilities especially with twin engines and manoeuvrability is tremendously improved. I find it great for fighting fish, sits well on the water and quick to get up on the plane. I would highly recommend anyone in the market looking for a great fishing boat or upgrade should consider the S8 - you simply can't beat it for comfort and safety.

Michael Gourlas - Sailfish S8

Everything about the Sailfish product is quality. Nothing is inferior, from the boats welding, the perfectly neat wiring, the fishing stability, right down to their choice of Furuno Electronics and Honda Marine Outboards. The best of the best.

It's one thing to purchase your dream boat, and another to know that Webbe Marine have got your back. They really do go out of their way to stand by their product. I have purchased lots of big ticket items and no one has that level of after sales service, and have had many different boats in my life but nothing even come close. It's true what they say, once you've owned a Cat you can't go back. I absolutely love my "Sailfish S8" fishing weapon.

COMMERCIAL BOAT BUILDING

From the first commercial hull that rolled off the production line in 1993, Sailfish Catamarans prides itself on being at the forefront of commercial boat building in Australia year after year.

Building a boat to meet the exact needs of a commercial operator can be tough. Most boat builders want to get your business to fit their existing designs.

At Sailfish Catamarans our commercial specialists take the time to first understand and then custom design a boat to best suit your specific requirements. Once this is completed, your new boat is built to the highest standards within the complex regulatory guidelines set out for survey builds.

Overseen the whole way by professional and independent certifiers, your Sailfish Commercial Series comes with all the necessary compliance to ensure that your boat is ready to start work from day one.

Sailfish Catamarans has supplied boats to Government Departments, Local Councils, Rescue Organisations, International Heads of State, Commercial Fisherman and Divers, Mining and Aviation Industries, Hire and Drive Operators and more. With hundreds of commercial boats out in the field you can rest assured a Sailfish Catamaran will be up to the task.

Please contact one of our team to discuss your needs today.

FOUNDED IN 1993, SAILFISH CATAMARANS HAVE GROWN FROM STRENGTH TO STRENGTH AND ESTABLISHED THEMSELVES AS CLEAR MARKET LEADERS.

Our growth and success has been as a direct result of the efforts of all of our team. The Sailfish team have met stringent standards required by government and maritime authorities, professional fishermen, safety & rescue bodies as well as a large number of pleasure craft owners.

From a staff of two producing five boats a year, we have grown to a staff of over twenty full time tradesmen and apprentices producing approximately thirty custom built plate aluminium power catamarans per year. Our success is dependant on the teamwork that exists in our company and we will continue to cultivate the highest levels of ethical standards and workmanship within our workplace.

The aims of our business are to ensure a professionally custom built, high quality range of aluminium power catamarans for the leisure, commercial and rescue boating markets.

We are proud of being acknowledged as the best in our field by industry commentators and professional boating journalists. Many of our customers chose us after extensive research and investigation of other boat builders in Australia and overseas, they have recognised the high standard of quality workmanship put into every one of our vessels. We now have many customers who are repeat buyers of our boats and continue to upgrade to larger models.

Sailfish Catamarans will always continue to be market leaders not market followers with our products. Our philosophy is to build quality boats that not only meet but exceed our customers' expectations.
